

White Paper

Version 1.1

A ideal world, governed by smart contracts.

Important

The success of a project depends on the number of users. We have identified several strategies that allow us to quickly become market leaders. We believe that the real success of the NFT depends on their adoption, the more use cases of the NFT will lead to faster adoption.

1. Why iFarm Manor

What can be better in the world of NFTs and collectibles than transposing the world imagined by George Orwell into the world of blockchain. **iFarm Manor DAO** will be a fairly governed community where everyone can propose and vote for the best of the whole community.

We believe that in a well-managed DAO community everyone can benefit themselves and everyone else.

To increase the visibility of all this we also want to develop our own marketplace “**iFarm Manor Marketplace**”, an auction market for non-fungible tokens developed on Polkadot.

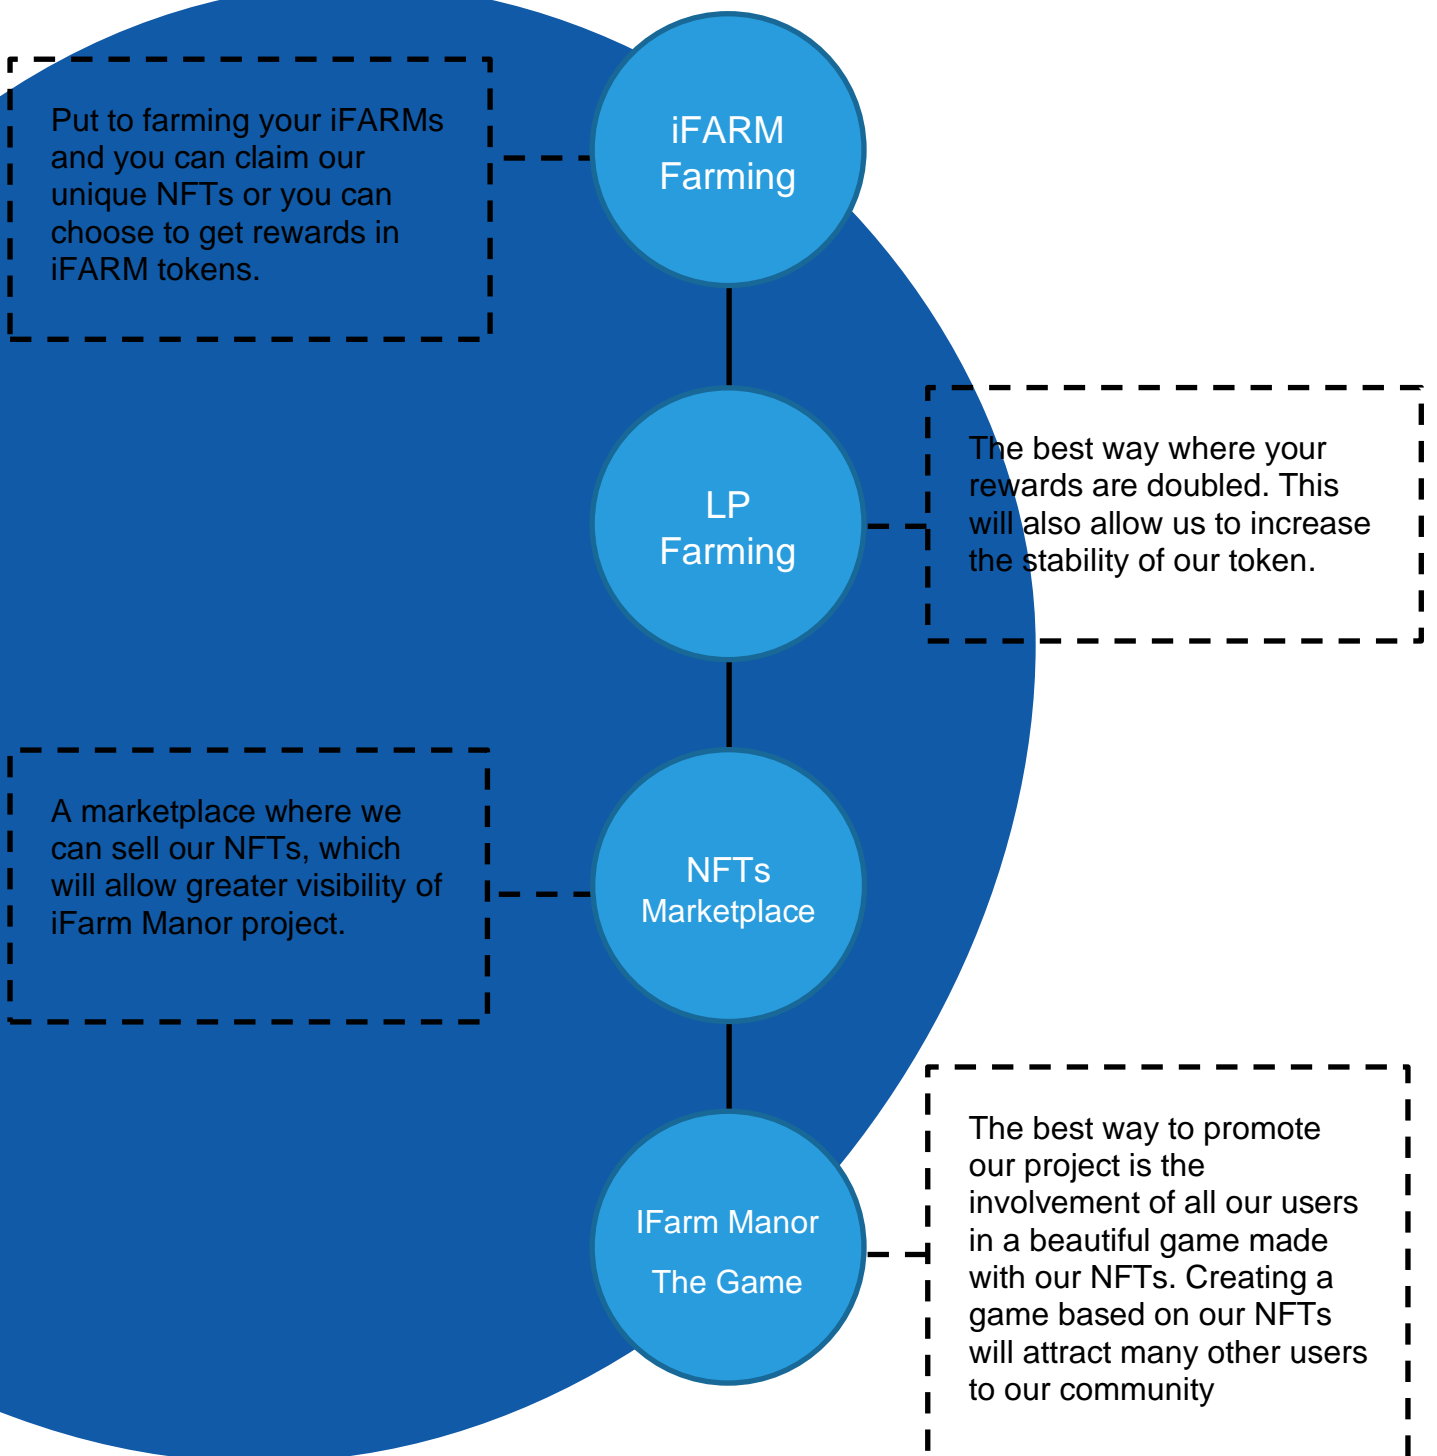

We don't want to limit NFTs to just collecting but also give them a real world utility. For this we will work hard to get more value of our NFTs.

We are sure that the quality and the various use cases of our NFTs will increase their value over the time. This is why we thought of “**Manor Farm - The Game**”, a game in which our NFTs gain value and visibility.

We also thought about how to increase the value of our **iFARM** token over the time because our investors need to be protected. A deflationary strategy will certainly increase the value of our token. For this reason we have decided to burn a part of the earnings from the sale of our NFTs to reduce the number of our tokens put into circulation over time.

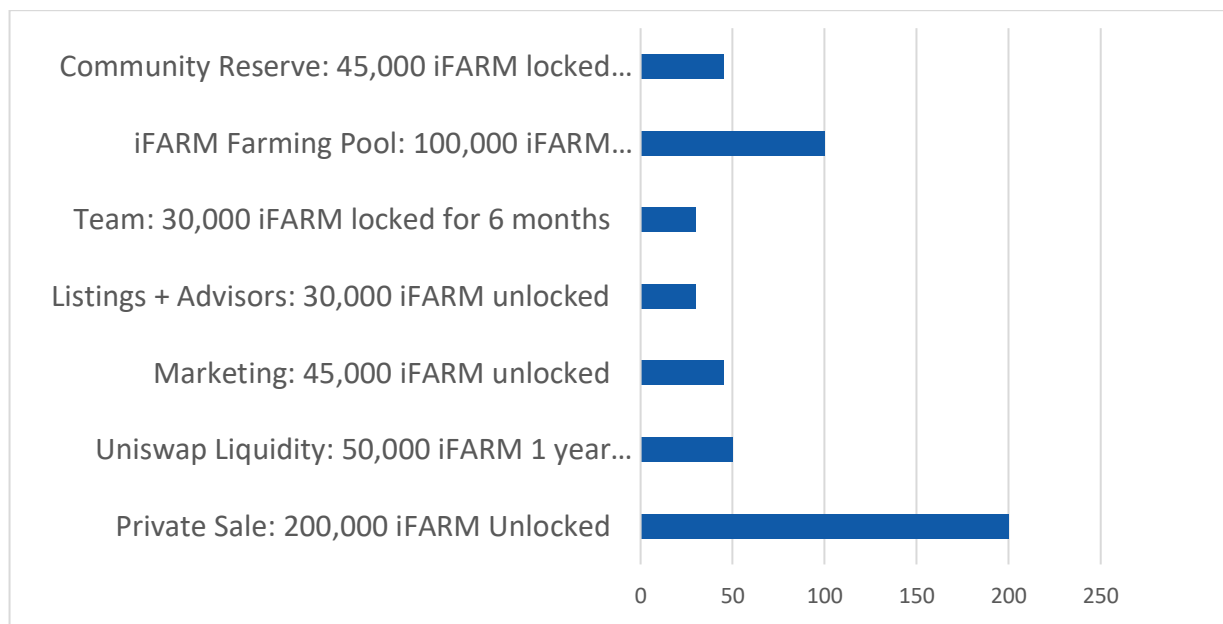

Reduce the number of tokens put into circulation and good marketing work will attract new investors too.

2. Farming, NFTs and more others

3. iFARM Token Allocation

The allocation of total iFarm Manor Tokens is the following:

\$iFARM Token Information

Token Name: iFARM MANOR

Ticker: iFARM

Contract Address: 0xaa665fC881A87B7B194E7422B22E8e6867DD77D7

Total Supply: 500,000 iFARM

Private Sale: 200,000 iFARM

Soft Cap: 100,000 iFARM

Private Sale Price: 3.5 USD

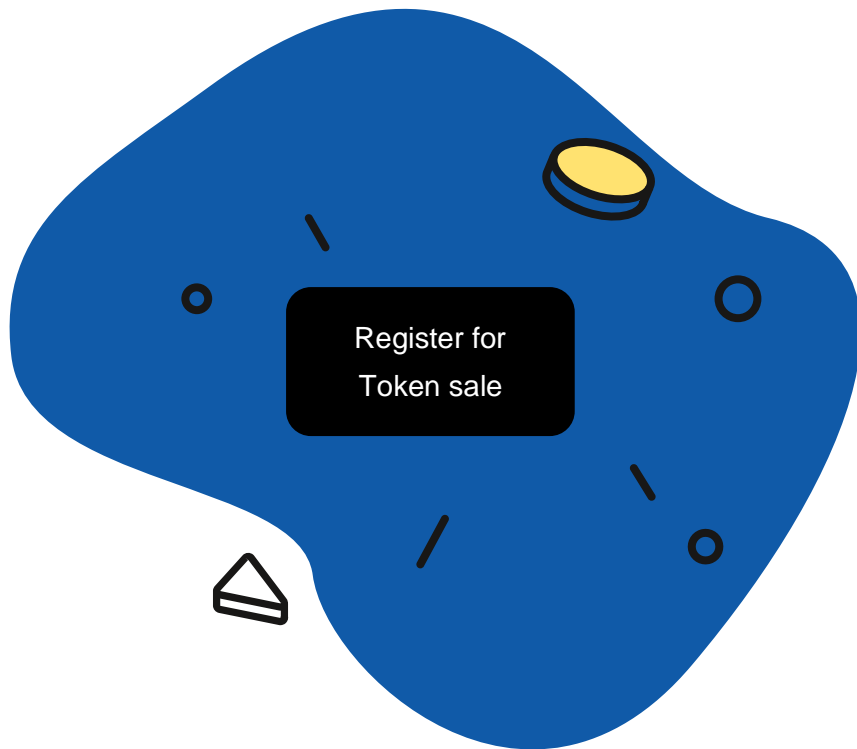

The Project

iFarm Manor - A smart version of George Orwell's novel's world in which the ending will be completely different.

4. Roadmap v1

- | | | |
|----------------------|---|---|
| December 2020 | ○ | <ul style="list-style-type: none"> + Start the iFarm Manor project and development. + Start the Public Sale |
| January 2021 | ○ | <ul style="list-style-type: none"> + Listing iFARM on Uniswap with liquidity locked for a year. + Start the iFARM and the LP farming, White Paper was released. + Listing iFARM on Top Exchange + Start the NFTs development integration on the iFarm Manor website. + Start the iFARM Manor Game contest and development. + Create the iFarm Manor DAO Group and start the Governance. |
| February 2021 | ○ | <ul style="list-style-type: none"> + Release the NFTs integration on the site, start more use cases for our NFTs. + Start the NFTs minting on the site with a deflationary program + Start the iFarm Manor Marketplace development. |
| Q2/2021 | ○ | <ul style="list-style-type: none"> + Introduce collaborations with new artists for our NFTs |
| Q3/2020 | ○ | <ul style="list-style-type: none"> + Release the iFarm Manor Marketplace. |
| Q4/2020 | ○ | <ul style="list-style-type: none"> + Release the iFarm Manor Game. |
